

The Web, made human.

Technology should bring us together.
Without taking us away from ourselves.

Research. Discussion. Open projects.

WEB V FOUNDATION

From attention to intention.

A better Web does not need
a more captive human.

AUDIENCE → PERSON

PLATFORM → PERSONAL SPACE

ENGAGEMENT → MEANINGFUL ACTION

The whole idea is in the name.

WEB V

01 / NAME

WEB V

WV

02 / ESSENCE

WV

VVV

03 / REVEAL

Three V forms

04 / UNITY

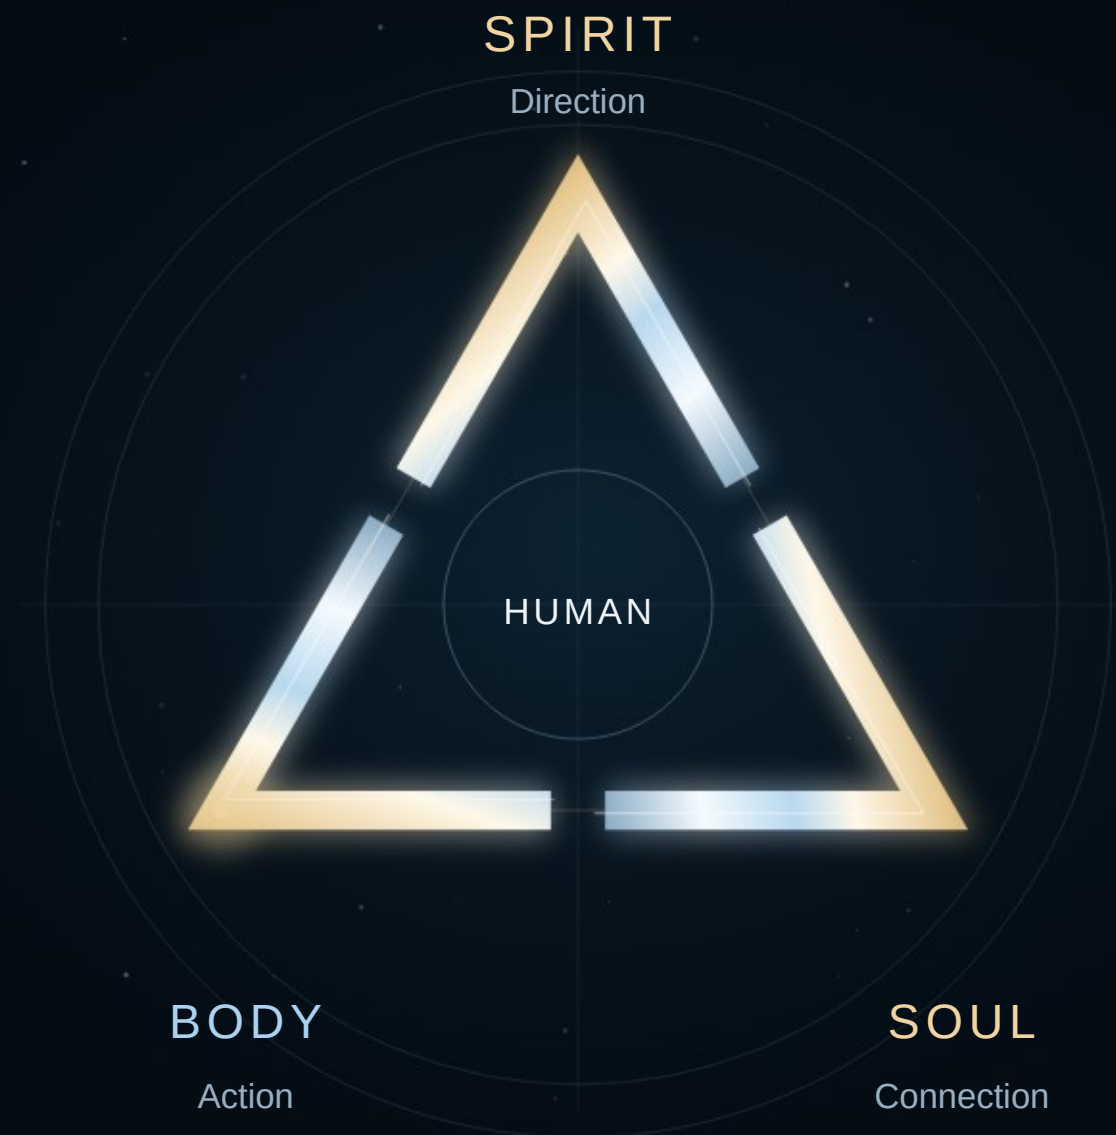

One whole

Nothing is added. The hidden structure is revealed.

Three parts. One human.

Spirit gives direction.
Soul creates connection.
Body makes action possible.

A metaphor for wholeness.
Not a belief system required to participate.

The mark becomes the system.

Geometry gives structure. Light gives meaning. Motion reveals the relationship.

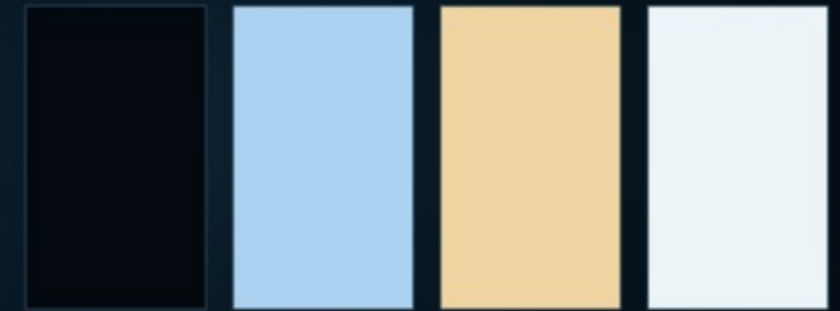

ONE SHAPE

Three V forms. Never a generic delta.

ONE GEOMETRY

60° structure · 120° relationships

ONE ATMOSPHERE

Midnight. Ice. Champagne.
Precision without visual noise.

One ecosystem. Distinct responsibilities.

Vilnism asks why.
WEB V turns ideas into proposals.
TOS makes them testable.

Civilization OS is the shared horizon,
not a finished product.

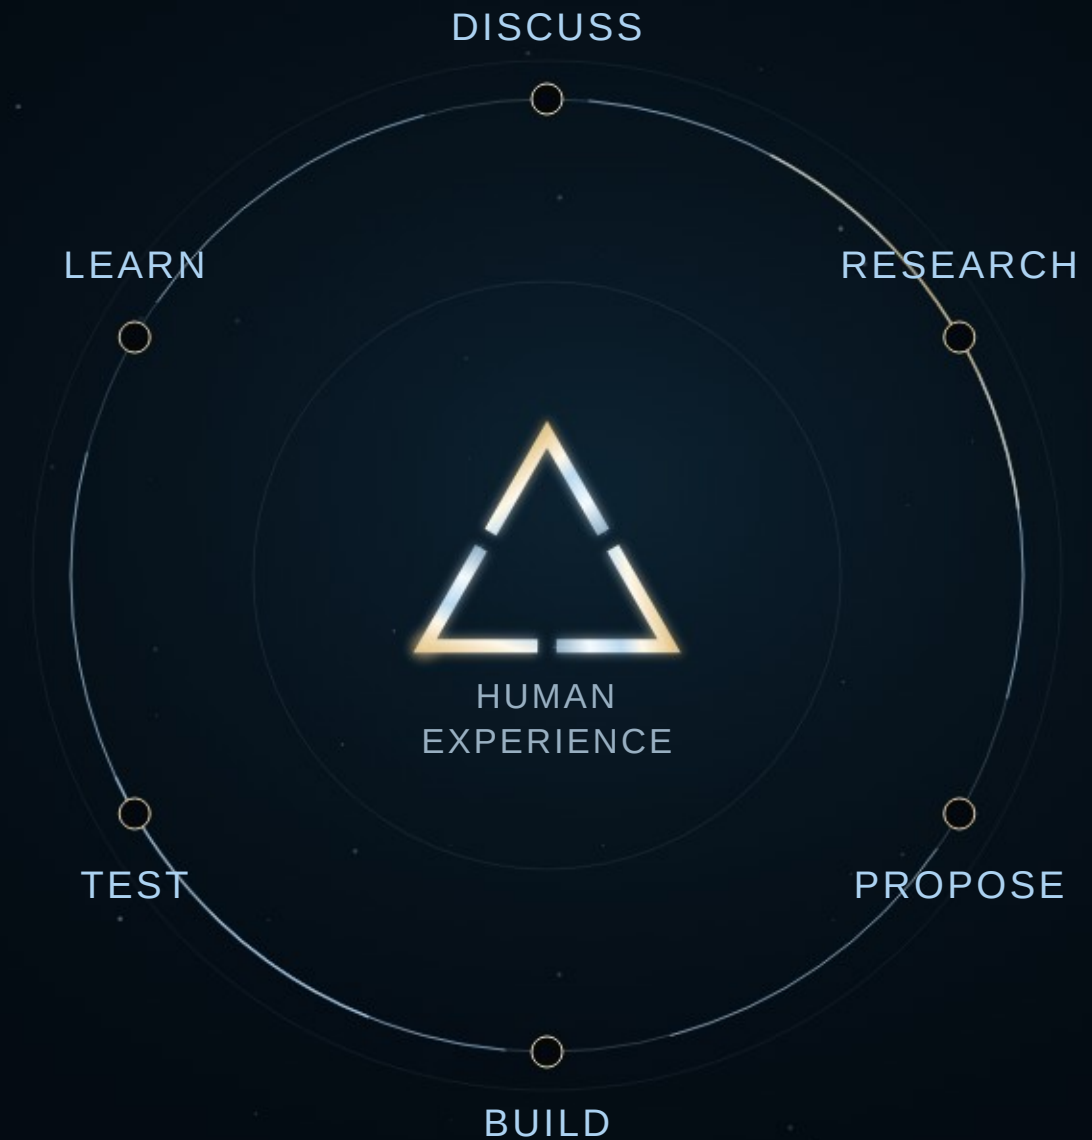

A forum is the beginning. Not the boundary.

Turn a question into a system.

Can media exist
without advertising?

A question becomes a proposal.
A prototype meets human experience.
The evidence comes back.

Discussion with memory.

Not the loudest opinion. The clearest path from question to decision.

Personal AI

Identity & data

Media without ads

Nodes & resources

Who should own personal AI?

QUESTION

Can a person move their AI, memory and permissions without losing control or becoming locked in?

01

Personal Node Architecture

WEBV-003

User-Owned Identity

WEBV-004

Advertising-Free Environments

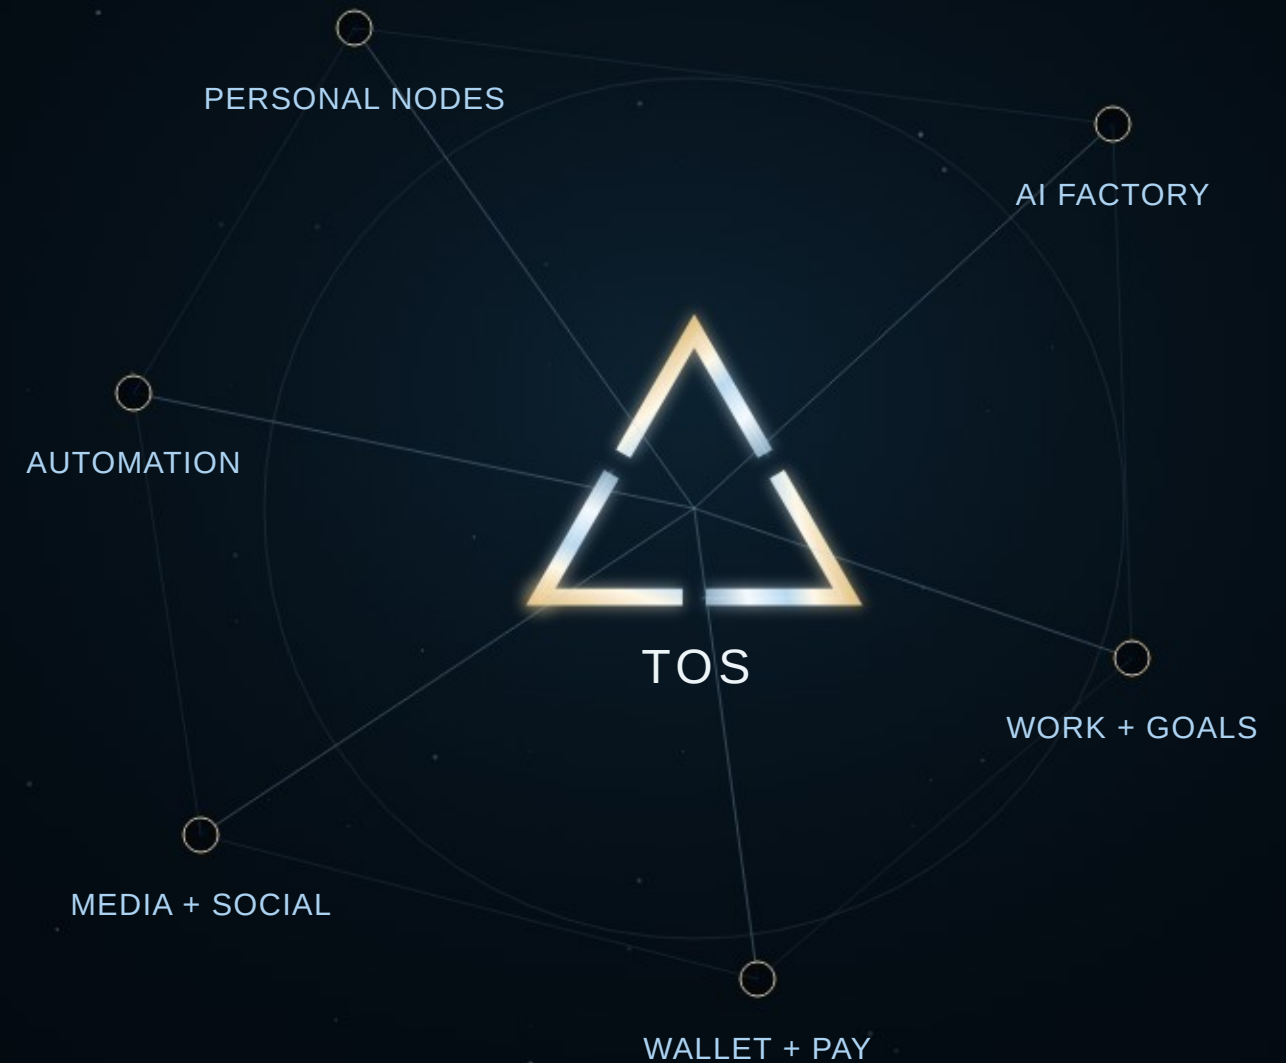

WEBV-005

Personal AI Sovereignty

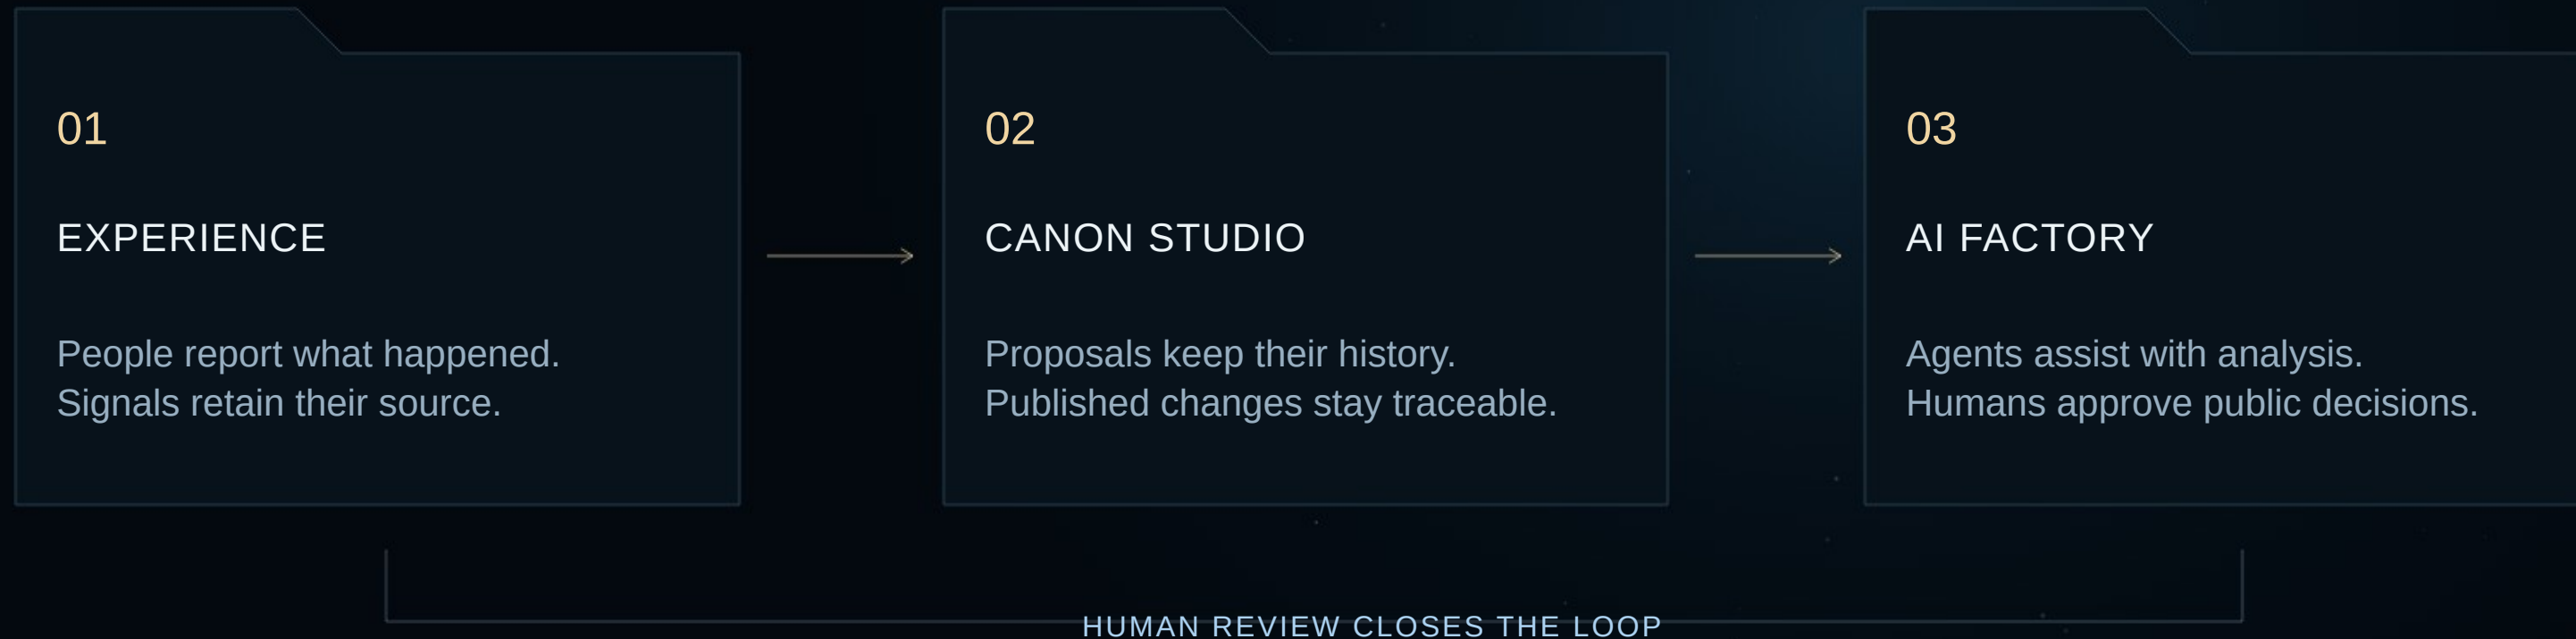

TOS makes the ideas testable.

A self-hosted operational environment connecting people, resources and AI.

Modules are at different stages.
This is a direction map, not a release checklist.

One knowledge loop. No invisible authority.

No attention tax.

Charge for useful tools and infrastructure.
Not for turning a person into inventory.

01

CONTROL

Your data. Your permissions.
A meaningful way to leave.

02

NO ADS

No purchased ranking.
No attention extraction.

03

OPENNESS

Documented interfaces.
Independent implementations.

04

CHOICE

Voluntary participation.
No required worldview.

From a personal node to a shared horizon.

PERSON

Personal tools, data and agency.

COMMUNITY

Shared knowledge and voluntary coordination.

CIVILIZATION

A research horizon — not a promised outcome.

A foundation earns trust.

The name is a responsibility.
Not a certificate of neutrality.

Founding-stage initiative.
Governance must develop in the open.

VISIBLE DECISIONS

Who proposes, reviews and decides?

VISIBLE FUNDING

Who pays, and what influence do they have?

REAL PARTICIPATION

Can others disagree, contribute and build?

Launch a place. Grow a community.

△ NOW

A coherent public home

Vision · identity · concept notes

△ NEXT

A structured forum

Questions · evidence · proposals

△ THEN

A living research loop

Pilots · contributors · governance

Explore. Challenge. Build.

Inspired by Vilnism.
Open to independent thought.
